

# TAR BARRIER

## DESCRIPTION:

Tar Barrier is an all natural, bio degradable, non-toxic liquid designed to prevent tracking and picking of freshly applied hot melt crack and joint sealant. When sprayed on the surface of the sealant, Tar Barrier provides a protective barrier which allows shadow vehicles and traffic immediate access to the repoured pavement. Use Tar Barrier in place of sand or messy toilet paper to reduce traffic control issues, shorten lane closure and wait time. A one man operation with a quick spray of Tar Barrier, your pavement is ready for traffic.

## CAUTIONS:

Do not take internally. If accidental ingestion does occur, drink large amounts of water and consult physician. If splashed into eyes, flush with large volumes of clear water. Triple rinse empty container with water before discarding in authorized landfill site.

## DIRECTIONS:

Tar Barrier is poured into typical hand pump pressurized garden hand pumps. The spray pattern should be adjusted to a medium fan. Tar Barrier can be applied to the sealant immediately after sealant is placed or at any time after sealant is placed when surface tack is present. Tar Barrier is a water-based product and should not be exposed to freezing temperatures. Dilute 1:1 and apply through a sprayer. Product may also be diluted with water up to a 4:1 dilution, if excessive heat is not an issue.
