

POOL & SPA

BR**ODY**
CHEMICAL

WELCOME TO BRODY CHEMICAL

Brody Chemical began operations in Salt Lake City, Utah in 1975. Since then, the company has grown from a small local company to one that provides superior products and services to over half of the United States. Brody's success is attributed to its commitment to create innovative and highly effective products—manufactured under strict quality control standards, a responsive technical support team, and a professional, well-trained, service-driven sales force. Brody Chemical's comprehensive product line boasts over 600 different formulations of sanitation, institutional, industrial and maintenance chemicals for professional use. Reducing the risks associated with chemical usage and disposal, avoiding depletion of the Earth's natural resources, and enhancing the safety and work environment for clients are core values of Brody Chemical.

PRODUCT CATEGORY INDEX

ACCU-TABS ■ CALCIUM HYPOCHLORITE 3" TABS.....	4
ACID MAGIC ■ BUFFERED MURIATIC ACID.....	4
ACID REPLACEMENT CLEANER ■ ACID-FREE CLEANER.....	4
ALGAECIDE ■ ALGAE GROWTH DEPRESSANT.....	4
ALKALINE BUILDER ■ RAISES TOTAL ALKALINITY.....	4
AQUABLUE SHADE ■ SLOWS ALGAE GROWTH.....	4
BROMINETABS ■ POOLS AND SPAS.....	4

WATER CLARIFIER ■ SWIMMING POOLS AND SPAS.....	7
WINTER FLOATER ■ CLOSED POOL CHLORINATION.....	7
WIPE OUT ■ SHOCK TREATMENT FOR POOLS.....	7

ACCU-TABS

CALCIUM HYPOCHLORITE 3" TABS

This pool and spa disinfectant is ideal for both indoor and outdoor applications. Accu-Tabs contain 67% chlorine and eliminate the constant concern of Cyanuric Acid build up in the pool. Stabilizer can still be added and controlled, so no more draining the pool when Cyanuric Acid gets too high.

ACID MAGIC

BUFFERED MURIATIC ACID

Acid Magic is a technological breakthrough for the pool and spa industry. This product is equal in strength to muriatic acid, but does not exhibit the dangerous side effects. Acid Magic is safe to handle because it is buffered and will not attack skin or emit dangerous fumes. It reduces harmful fumes of hydrochloric acid up to 90%.

ACID REPLACEMENT CLEANER

ACID FREE

Acid Replacement Cleaner is a very powerful cleaning product that should be used on **HARD SURFACES ONLY**. This product replaces acids and acid type cleaners to take care of a large variety of cleaning and maintenance programs. It is acid free, 100% biodegradable, non-toxic, environmentally safe, nonflammable and user friendly. Removes calcium deposits and is great for cleaning grout without any unpleasant odors. Has a fresh lemon fragrance.

ALGAECIDE

ALGAE GROWTH DEPRESSANT

Algaecide is a quaternary micro biocide formulated for swimming pools and spas to control algae and other biocides in open water recirculation systems. This product provides rapid release of safe and effective algae control. It will not damage tile, concrete, metal or plastic. Extremely concentrated.

ALKALINE BUILDER

RAISES TOTAL ALKALINITY

Alkaline Builder is used to raise the total alkalinity of swimming pool water. The total alkalinity reading is an important part of the pool water balance. Low total alkalinity can cause rapid deterioration of plaster, paint, vinyl, as well as heat exchangers, which results in iron and copper stains. This product raises total alkalinity and acts as a buffer to prevent pH "bounce."

AQUABLU SHADE

SLOWS ALGAE GROWTH

Aquablue Shade is a scientific blend of inert dyes, which, when introduced into ponds, and lakes, effectively inhibit sunlight from promoting aquatic weed and algae growth. This product is not an herbicide but works using natural shading control methods. This shading of the water effectively controls unwanted aquatic growth in industrial ponds, fish ponds, golf course ponds, irrigation canals, decorative fountains and aquariums.

BROMINE TABS

POOLS AND SPAS

Bromine Tabs are a great choice of disinfectant for indoor pools and spas. Bromine is 2.25 times heavier than chlorine in its diluted form. This is beneficial because it prevents the loss of disinfectant in a hot tub (spa) due to evaporation. Bromine also keeps killing bacteria long after chlorine products have stopped.

CALCIUM BUILDER

KEEPS WATER IN BALANCE

Water is very thirsty for calcium and it readily dissolves in it. If a pool is made out of concrete and/or plastered, and is in an area where the natural water is low in calcium; then calcium must be added to the water. If it is not the water will dissolve the calcium out of the concrete or plaster. This will result in very rough surfaces. Also tile may start to fall off as a result. Consequently, a great deal of damage can occur. To rectify the situation, simply add enough of our calcium builder to the water to bring the level up to between 150 and 200 ppm of calcium.

CALCIUM HYPOCHLORITE

GRANULAR 67% CHLORINE

This granular chlorine contains 67% available disinfectant and is very popular in the pool and spa industry. Granular chlorine is used to super chlorinate, shock or simply increase the chlorine level when broadcast by hand. This product is a must-have.

CHLORINE GRANULAR

POOL SANITIZER

This product is a stabilized, 99% active, granular chlorine. It is an effective pool sanitizer and works well to super chlorinate pools and spas. When super chlorinating a pool, the free available chlorine reading must be lowered below 5 ppm before swimmers can enter the pool. Chlorine Granular is very effective for smaller pools where it is manually applied.

CHLORINE TABS

STABILIZED 1" & 3" TABS, 2" STICKS

Chlorine Tabs are stabilized to protect against chlorine loss due to the sun's ultraviolet rays. These concentrated tabs contain up to 99% chlorine and provide 24-hour protection against harmful bacteria and unsightly algae growth. These tabs are 100% soluble; no binders or fillers are added and they do not contain calcium. Consult a Brody Chemical representative about the proper feed system for Chlorine Tabs.

DEFOAMER

SPAS & HOT TUBS

This product is a water dilutable defoamer & antifoamer, offering immediate defoaming action and long term foam prevention with good stability and anti-foaming action in alkaline and non-alkaline solutions. Works with super-speed to knock down typical foam caused by such elements as fats, detergents, oils, and wastes, regardless of temperature or locale.

DESCALER

REMOVES MINERAL DEPOSITS

This product is an economical, safe and easy way to remove rust, corrosion, scale and water deposits from almost all hard surfaces. Descaler is a combination of deep penetrating detergents and safe, easy-to-use, mild acids. It keeps fumes to a minimum and is harmless to most paints and finishes. Descaler acts quickly to penetrate and lift away scum and water deposits. It dissolves carbonates and other hard water scales, such as iron, rust, magnesium, and many other insolubles.

FILTER CLEANER

FOR POOLS AND SPAS

Filter Cleaner is a non-acid, heavy-duty cleaner for swimming pool, therapeutic pool, spa and hot tub filters. It is effective on all types of filters; sand, d.e. and cartridge. Periodic use of this product increases filtration, lengthens filter runs and lowers maintenance cost. This product removes mineral scale, body fats, suntan lotions, oils, cosmetics, scum, grease, calcium and other deposits that clog filters and cut filtration efficiency.

LIQUID CHLORINE

WATER DISINFECTANT

Liquid Chlorine is a super concentrated, pool-water disinfectant. For an original fill or spring start-up, super chlorinate with 54 to 108 oz. of product for each 10,000 gallons of water to yield 5 to 10 ppm available chlorine weight. To maintain the pool, add 12 oz. of the product for each 10,000 gallons of water to yield an available chlorine residual between 0.6 and 1.0 ppm by weight. May be added manually or by a feeder device.

PH DOWN (GRANULAR)

LOWERS PH

This product is used to lower the pH of swimming pool, spa and hot tub water. The effectiveness of a disinfectant such as chlorine is controlled by keeping the pH between 7.2 and 7.8. The proper pH level is maintained by keeping total alkalinity between 80 ppm and 180 ppm. The pH and total alkalinity are related and test results are considered together. After testing the water, refer to the pH total alkalinity chart to determine the correct amount of this product to use.

PH UP (GRANULAR)

RAISES PH

This product is used to raise the pH of swimming pool, spa and hot tub water. The effectiveness of a disinfectant such as chlorine is controlled by keeping the pH between 7.2 and 7.8. The proper pH level is maintained by keeping total alkalinity between 80 ppm and 120 ppm. The pH and total alkalinity are related and test results considered together. After testing the water, refer to the pH chart to determine the correct amount of this product to use.

PH UP (LIQUID)

RAISES PH

This product is used to raise the pH of swimming pool, spa and hot tub water. The effectiveness of a disinfectant such as chlorine is controlled by keeping the pH between 7.2 and 7.8. The proper pH level is maintained by keeping total alkalinity between 80 ppm and 120 ppm. The pH and total alkalinity are related and test results considered together. After testing the water, refer to the pH chart to determine the correct amount of this product to use. This product is especially formulated for use with a liquid feed system.

POOL ACID LIQUID

CLEANING AND BALANCING PH

Pool Acid Liquid is excellent for cleaning the scale and mineral deposits that form around pool spas. It is concentrated and may be diluted with up to 20 parts of water. Pool Acid Liquid can also be used to lower the pH of swimming pool, spa and hot tub water. May be used with a liquid-feed system.

POOL STABILIZER

PREVENTS CHLORINE LOSS

Pool Stabilizer prevents chlorine dissipation caused by sunlight. Use if intense sunlight causes difficulty in maintaining a chlorine residual. Measure the stabilizer concentration with a test kit. The ideal range is 40-50 ppm. This product is made from Cyanuric Acid and must be handled correctly. Do not exceed 100 ppm or chlorine effectiveness will be reduced.

POOL STAIN REMOVER

REMOVES METAL STAINS

If, when adding a chlorine to the pool, a green or brown color develops, this may be due to the copper or iron in the water. Our product will solubilize this material and prevent staining of the pool finish. Water clarity will return. This product is also highly recommended for new pools while water is being added.

SCALE & STAIN REMOVER

PLEASANT FRAGRANCE

This product has been developed to be safe, yet very effective at removing stubborn stains, soap scum and hard water deposits from porcelain and fiberglass, shower stalls, tubs, tile, grout and stainless steel fixtures. Scale/Stain Remover can be used full strength on toilets, showers, sinks, tubs, drinking fountains, urinals, glass and plastic shower doors. It has a very pleasant lime fragrance and it is artificially "thickened" so that it will cling to all vertical surfaces

WATER CLARIFIER

SWIMMING POOLS & SPAS

Water Clarifier is a flocking agent used to keep pool water clear and sparkling. It causes suspended particles to flock together for easy removal by filtration system. It is a polyacryamide in a water emulsion (polyelectrolyte) and is unaffected by bromine. Water Clarifier is non-irritating, biodegradable, organic and effective at all pH values.

WINTER FLOATER

CLOSED POOL CHLORINATION

Winter Floater is used for continuous winter chlorination. The bag containing the chlorine sticks hangs below the surface of the water. Use one Winter Floater per 10,000 gallons of water. Place in the center at the deep end of the pool. Keep the pool closed to all swimmers as long as floaters are in the pool.

WIPE OUT

SHOCK TREATMENT FOR POOLS

Wipe Out is a powerful, non-chlorinating oxidizer. It destroys organic contaminants known as chloramines. This product does not contain chlorine so the extended waiting period, before swimming can be resumed, is avoided. Used weekly, this product assures longer lasting, free chlorine residuals and restores sparkle and clarity to pool water.

A group of yellow rubber ducks floating in water. The ducks are arranged in a line, with the one in the foreground being the largest and most prominent. The water is dark and rippled, and the background is slightly blurred.

ABOUT BRODY CHEMICAL

Brody Chemical sells and provides service to over 50,000 customers in a variety of industries including manufacturing, industrial, mining, automotive, institutional, hospitality, trucking, food and beverage, agricultural, and medical. Brody Chemical's sales representatives are trained to offer technical assistance and recommendations in selecting solutions and cleaning processes that best meet the needs of clients.
