

SOIL CONDITIONER

Acondicionados De Césped

DESCRIPTION:

This product is a new soil additive that breaks down the surface tension of dry soil, so water can penetrate down into the root system. Treated soil attracts what water is available, even dew. As water is applied to the soil, our product spreads wider and deeper into the soil, opening up tiny channels between the particles of clay. This product works best in the top 20 inches of the soil and keeps moisture in the root zone of the plants and turf. When soil is very dry (as in a drought), the surface tension increases, preventing absorption when water is available. Using this product will ensure that any water put on the surface will penetrate quickly and efficiently down to the root zone, keeping your grass greener while using up to 75% less water.

CAUTIONS:

Protect product from freezing temperatures. Do not ingest. If this should occur, drink large amounts of water and consult physician. For eye or skin contact, flush area with water for 15 minutes. Seek medical attention if irritation persists. Triple rinse empty container before discarding in an authorized landfill site.

DIRECTIONS:

For Greener Lawns With Less Water: Dilute 1 quart of product with five gallons of water to treat 3,000 to 4,000 square feet of grass or plants. Use approximately three gallons to treat each acre of ground.

To Treat Soil Compaction Or Drainage Problems: Mix 1 gallon of product with a minimum of 20 gallons of water to treat 3,000 to 4,000 square feet of grass and/or plants. Use approximately six gallons to treat each acre of ground. For maximum results, treat lawn and plants every four weeks or as needed.

This product may be mixed with chemicals such as fungicides, herbicides, insecticides and soluble fertilizers. This product works excellent when applied through a fertigation system.

PRECAUTION: AL USARIO: Si usted no lee Ingles, no use este producto, hasta que la etiqueta le haya sido explicada ampliamente.

TO THE USER: If you cannot read English, do not use this product until this label has been fully explained to you.
