

# DEGREASER W/ENZYMES

Desengrasador

## DESCRIPTION:

Degreaser with Enzymes features tough cleaning agents formulated to remove silt and soot from walls, steel and many other surfaces. It is also tough enough to remove the heaviest smoke odors. This product is a "non-emulsifiable" degreaser that contains the newest "bioremediation enzymes" available on the market today. It cleans by dispersion. It breaks the oil down into micro particles so that it can be washed away and then immediately floats the oil back to the surface so that it can be separated from the waste water. The enzymes actually consume the greases and oils as you clean and then continue to work long after the waste oil and greases are discarded. It is 100% biodegradable, water-soluble and contains no hazardous ingredients. Has a pleasant cherry fragrance.

## BENEFITS:

- Contains Bioremediation Enzymes that actually "consume" greases and oils.
- "Non-emulsifiable" Degreaser that is especially effective when used in an area with an oil separator because the grease and oil is cleaned up by "dispersion" and then immediately floats to the top of the water to be skimmed off.

**PRECAUTION: AL USARIO:** Si usted ne lee Ingles, no use este producto, hasta que la etiqueta le haya sido explicada ampliamente.

**TO THE USER:** If you cannot read English, do not use this product until this label has been fully explained to you.

## DIRECTIONS:

This industrial strength Degreaser with Bioremediation Enzymes is made to be used on many different surfaces and also on areas of various difficulties of greases and soils. Consult the suggested dilution chart below and vary the concentration of the solution according to the grease and soil conditions. Dilute product to the desired concentration, apply to surface using sprayer, sponge, rag or mop. Allow surface to air dry or wipe dry with a clean damp cloth.

## RECOMMENDED DILUTIONS:

1. Light Soil.....50 to 1
2. Medium Soil.....40 to 1
3. Heavy Soil.....30 to 1
4. Soot Removal.....8:1

**CAUTIONS:** Avoid contact with skin and eyes. If contact occurs flush with water for 15 minutes. Seek prompt medical attention. Do not ingest. If swallowed give one to two glasses of water followed by fruit juice. Call physician immediately. Triple rinse empty container before disposal in an authorized landfill site.
